

# REFER A FRIEND

## **Are you a student of Fresno Music Academy & Arts (FMAA)? Do you have a friend or family member who would like to learn music?**

Encourage them to learn music with us at FMAA, just like you! Send them our way and make yourself AND your friend \$20.00. You'll also have a chance to WIN BIG in our raffle!

## **What do we consider a referral?**

A referral is when a current FMAA student refers a friend or family member to take music lessons or group classes with us. When the friend/family member of the current student has completed our registration form and committed to a minimum of one (1) full month of music lessons or group classes, both the current student AND their friend/family member will get an Amazon gift card worth \$20.00.

## **How does it work?**

**Refer A Friend** is an ongoing referral rewards program. We are always accepting STUDENT REFERRAL CARDS throughout the year, where you and your friend or family member have a chance to win a \$20 Amazon gift card. There are two chances in the year to WIN BIG! Every referral gets entered into a raffle drawing with a chance to win a \$250 Amazon gift card. The 1st drawing will occur at our Spring Fling Showcase, and the 2nd drawing will occur at our Winter Wonderland Showcase. After the winter showcase, the drawing will conclude for the current year and start up again for the following year.

**NOTE:** A current FMAA student who turns in a referral can only be awarded one (1) \$20 Amazon gift card a year, no matter how many student referral cards they submit. However, if a current student submits multiple referral cards, they get multiple entries into the drawing for both the spring and winter showcases.

**Start now.** Use the STUDENT REFERRAL CARD to refer a friend. The cards to be completed are at the front desk at any FMAA location. Either mail it to us or bring it in at your next lesson, and we will handle it from there. Or, go to our website:

[www.fresnomusicacademy.com/referral](http://www.fresnomusicacademy.com/referral) and complete the form there. It's that easy.
